

How to Use Autoresponders

This document describes the use of "Autoresponder" mailings in YourVirtuoso. Autoresponders are different from regular mailings, because they are processed every day at the time you specify. They use special selectors that are time based, so that you can schedule a certain email to go to, for example, every family who contacted you 1 week ago. The autoresponder will run every day looking families that now meet that criterion and send the specified email to them.

Creating an Autoresponder

The screenshot shows the YourVirtuoso web interface. At the top, there's a navigation bar with links: home, messaging, support, help, change password, logout. Below this is a menu with tabs: Content, Classes, Families, Marketing, Reporting, Setup, My Info. The 'Marketing' tab is active, showing a 'Marketing Calendar' view. A dropdown menu is open under 'Marketing', showing options: Mailing, Templates, Referral Sources, Prospective Customers. The 'Add a Mailing' button is highlighted with a red circle. Below the button, there's a table of scheduled mailings. The table has columns: Name, Mailing Date & Time, Recipients, Status, and a 'clone' link. The mailings listed include various autoresponders like 'week after enroll', '3week after enroll', '3 Days after enroll', '2 Days after enroll', '1 Day after enroll', 'Week after contact', 'Day of contact', 'Day after contact', '2 Day after contact', 'P Sched now', 'P Sched 3 Day', 'P Sched 1 Day B4', 'P Sched 1 Day', 'P Att 1 Day after', 'P Absent', 'Test Day of Birthday', 'Test Birthday 2 days', 'Test Birthday', and 'should not repeat'.

Name	Mailing Date & Time	Recipients	Status	clone
week after enroll	5/15/19 3:00 PM	0	Scheduled	clone
3week after enroll	5/15/19 3:00 PM	3	Scheduled	clone
3 Days after enroll	5/15/19 3:00 PM	0	Scheduled	clone
2 Days after enroll	5/15/19 3:00 PM	0	Scheduled	clone
1 Day after enroll	5/15/19 3:00 PM	0	Scheduled	clone
Week after contact	5/15/19 1:30 PM	0	Scheduled	clone
Day of contact	5/15/19 1:30 PM	0	Scheduled	clone
Day after contact	5/15/19 1:30 PM	0	Scheduled	clone
2 Day after contact	5/15/19 1:30 PM	0	Scheduled	clone
P Sched now	5/15/19 1:00 PM	0	Scheduled	clone
P Sched 3 Day	5/15/19 1:00 PM	0	Scheduled	clone
P Sched 1 Day B4	5/15/19 1:00 PM	0	Scheduled	clone
P Sched 1 Day	5/15/19 1:00 PM	3	Scheduled	clone
P Att 1 Day after	5/15/19 1:00 PM	1	Scheduled	clone
P Absent	5/15/19 1:00 PM	0	Scheduled	clone
Test Day of Birthday	5/15/19 10:30 AM	0	Scheduled	clone
Test Birthday 2 days	5/14/19 9:50 PM	0	Scheduled	clone
Test Birthday	5/14/19 9:50 PM	0	Scheduled	clone
should not repeat	4/23/19 3:05 PM	2	Completed	clone

1. Access the Mailing screen using the **Marketing** menu
2. Click **Add a Mailing** to get started

Setting the basics

Set Mailing Recipients & Details

Please use the Select buttons to the lower right to build a query for retrieving customers you want to email. As you are building your query it will be displayed on the left and the total recipients will be shown. Click the X button next to it. Click the [view list of recipients](#) link to see emails that will receive your query.

Select families using student information

Select families by enrollment

Select families using contact information

Select families using account balance information

Email everyone

Select from prospects that contacted you

Select families and prospects based on timing

1. Select the **autoresponder** option, so it will be processed every day. The selectors (5) will change to those suitable for repeating mailings.
2. Autoresponders often come in groups. Perhaps you want to nurture a contact by sending them a series of emails the day after, week after and 2 weeks after they contact you. Name this email so you can easily see which sequence it belongs to and when it is sent in the sequence if appropriate.
3. Give it a subject that encourages the customer to open it
4. Pick a date for the FIRST time you want this to be sent and a time of day. The autoresponder will run every day at this time starting on that date. Consider the type of email and when it makes sense to have it processed. For example, if you schedule a "Thanks for previewing" email the day of the preview, you probably want it sent late in the day after the previews have all happened.

- Now click the special autoresponder selector to select which families receive this email

Select Who receives this email and When

*Send Date 5/14/20 5:58 PM

*Frequency ☐ one-time ☒ auto-responder

Choose Recipients Using an Auto-responder Query

Add an Auto-responder Query

Choose from the following criteria to build the list of recipients for this mailing

☐ Day of student enrolls in anything unit of any kind
taught by anyone at any location
on any day starting at any time

☒ Day of ☒ Attended Preview ☒ Missed Preview anything unit of any kind
taught by anyone starting at any time

☐ Day of after prospect's first contact

☐ On before student's birthday

Ok Cancel

- There are 4 trigger events for autoresponders. Enrollments, Previews, Initial Contact Us submissions, and student birthdays. Select the radio button for the type you are creating.
- Use the drop-down selectors to narrow down when you want this specific email to be sent. You will often create several similar emails (using the clone feature) to send a slightly different email immediately after an event, a few days after etc.
- Double check the criteria look good and click **OK**, and on the add mailing page click **Next >**

Add or Edit the body of your email

Set Mailing Content

Below are 3 methods for building the content of the email you wish to send the user's you've chosen. You can build a custom email, save it, or you can choose from a template you have built before now. Whatever you decide to use will be previewed in the field below.

[Preview](#)

Currently no content has been set.

Choose a method below for constructing the HTML content of your email.

Create Mailing Content

Upload a file to send

Choose Fileno file selected

Use a template to send

Choose

Search template library

There are 4 ways to add content, exactly as for regular mailings:

- **Create Mailing Content** takes you to the editor with a blank page to start on. (Note that if you have cloned a mailing, you start with the previous content, and this button will say **Edit Mailing Content**)
- **Upload a File** lets you import a text or html file that you have created outside YourVirtuoso. Note that MS Word documents, PDF's etc. are not compatible with this upload feature, but you may be able to save them as text and import them. It is not recommended to export MS Word as html for this purpose, as this creates a very complex html file using MS proprietary style commands that often conflict with YourVirtuoso html styling.
- **Use a Template to send** lets you select a template that you may have saved using the **Marketing/Templates** feature
- **Search template library** accesses a library of predefined emails that depend on the **affiliation(s)** you have selected under **MyInfo/Main**

After creating and formatting your email, click OK to get back to this page, and click **Next >**

Confirm all is good

Confirm Mailing Information

Review the information gathered below & confirm its accuracy before saving. Click the *Back* button to return to previous screen's & update any information entered incorrectly. If everything is valid then click the *Save* button to schedule this mailing. Once a mailing is scheduled in the system it can later be edited & have any information modified.

With multiple autoresponder running every day, you will probably be sending many more mailings than you have to date. To keep your list of mailing manageable, the default view will show recent, normal

mailings and the next scheduled processing day/time for each of your autoresponders.

To modify or stop an autoresponder, click it and edit or delete it.

1. You can see which are regular (one time) mailings and which are autoresponders in this column.
2. The Status column continues to show mailings that are scheduled (future) In Progress (now) and Completed (past). Note that only Completed regular mailings show here.
3. To see when autoresponders were sent, and who they were sent to, select **Completed Auto-Responders** from the **Scheduled** drop down
